

SUROJBEC MICHAEL

FULL STACK AND DEVOPS ENGINEER

Full-Stack and DevOps Engineer with 3+ years of experience building scalable web applications, backend systems, and cloud-native infrastructure. Skilled in Python, Node.js, TypeScript, React, Next.js, NestJS, FastAPI, GraphQL, MongoDB, PostgreSQL, Redis, Docker, NGINX and AWS. Experienced in developing high-performance APIs, optimizing system reliability and scalability, and delivering production-ready solutions. Strong problem-solving abilities, a focus on software quality, and a passion for modern technologies enable me to create impactful products that drive business value.

WORK EXPERIENCE

Full Stack Developer, EverbestLab

Jan 2024 - Mar 2026

- Developed and maintained scalable, production-grade web applications using Next.js, React, NestJS, GraphQL, and MongoDB, delivering high-performance and user-centric digital experiences.
- Engineered and implemented complex platform features, including authentication and authorization systems, real-time messaging, social interactions (comments, likes, follows), advanced search capabilities, and dynamic filtering mechanisms.
- Designed, developed, and optimized GraphQL APIs, database schemas, and backend architectures to ensure scalability, maintainability, and efficient data access.
- Implemented secure role-based access control (RBAC) frameworks for users, agents, and administrators, strengthening application security and access governance.
- Managed end-to-end deployment and infrastructure operations using Docker, NGINX, Linux-based VPS environments, and CI/CD pipelines, improving deployment reliability, operational efficiency, and system availability.

Frontend Developer , Softlane Company(Tashkent)

Sep 2022 - Dec- 2023

- Developed responsive web applications using React, Next.js, TypeScript, SCSS, and Material UI.
- Built dynamic features such as advanced filtering, authentication flows, real-time notifications, and interactive dashboards.
- Integrated GraphQL and REST APIs to manage and display data efficiently.
- Created reusable UI components and maintained a consistent design system.

EDUCATION

Namseoul University, MBA Sep 2024 - Aug 2026

University of Ulsan, BBA Sep 2024 - Aug 2026

TECHNICAL SKILLS

- **FULLSTACK:** Node.js, TypeScript, Python, PHP, JavaScript, Express.js, NestJS, React, Next.js, GraphQL, REST APIs, MongoDB, Mongoose, Redux, React Query, Context API, Axios, Fetch API, React Router, WebSocket, Socket.IO, Material UI (MUI), Bootstrap, HTML5, CSS3, Sass/SCSS, jQuery, TUI Editor, Swiper, Anime.js, Three.js, Fiber.js, Authentication & Authorization (JWT, Sessions, Access Tokens, Cookies), Multer, Sharp, CORS, DotEnv.
- **DEVOPS:** Linux (Ubuntu), Docker, NGINX, PM2, DNS Management, Firewall Configuration, GitHub Actions, GitHub Pages, Render, VPS Deployment, Production Infrastructure, CI/CD Pipelines, Performance Optimization, System Monitoring, Environment Configuration, Server Administration.
- **AI ENGINEERING:** OpenAI API, Google Gemini API, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Scikit-learn, Hugging Face Transformers, SentenceTransformers, PEFT (LoRA), LLaMA, TinyLlama, Tokenizers, Qdrant, Retrieval-Augmented Generation (RAG), MobileNet, Google Colab, Kaggle

VISA

D-10 Job Seeker Visa
